

# TEENAGE MUTANT NINJA TURTLES®

## Hand-painted 9" Cold Cast of Leonardo

### 1. To Remove Assembly Nut and Washer:

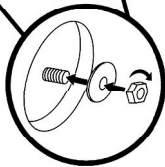

Hold Leonardo firmly at the torso and gently remove the assembly nut by turning it counterclockwise until the nut is completely removed from the assembly screw. Remove the washer by sliding it down the assembly screw.

### 2. To Place Leonardo on The Base:

Hold Leonardo firmly at the torso and carefully lower the feet into the registered foot holes on the base as shown. Make sure that the assembly screws do not scratch the surface while lowering the feet into the base. Before proceeding make sure the feet are firmly lowered into the base and that the assembly screws are exposed at the bottom of the base.

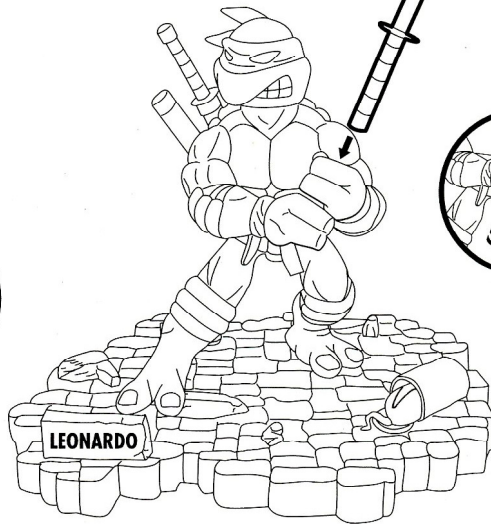

### 3. To Secure Leonardo to Base:

Spread out a clean dry cloth across a clean dry surface. Carefully hold Leonardo and tilt the entire base against the cloth surface until the assembly screw area is fully exposed. Carefully slide the washers onto the assembly screws then attach the assembly nuts by turning clockwise until tightened. Do Not use any tool to tighten nuts for it may cause damage to base surface.

### 4. To place Katana Sword in Hand:

After Leonardo is securely attached to base, unscrew the bottom portion of the sword handle by turning it counterclockwise until it is completely removed from handle. With the bottom section of the sword handle removed, slide the sword handle through Leonardo's hands until the hilt of sword touches top of hand. Take the bottom section of handle that was removed and screw it in the bottom of the handle by turning it clockwise until it is firmly tightened.

**WARNING:** Please remove any jewelry from hands or wrists to prevent abrasion. To clean, lightly apply a feather duster across all surfaces. Do not use any solvents, waxes or abrasives to clean.
